

THISARA DHAMMIKA ERANGA

Senior Product Owner | Product Manager

Atlanta, GA • (320) 316-6458 • thisara.dhammikaeranga@gmail.com • [LinkedIn](#) • [GitHub](#) • [Website](#)

PROFESSIONAL SUMMARY

Strategic, results-driven Senior Product Owner with 11+ years of experience driving digital transformation and full-lifecycle product delivery in enterprise banking environments. Proven success leading Agile/SAFe teams, aligning product roadmaps with business goals, and delivering RESTful API integrations. Certified in Building Agentic AI Applications, with hands-on training in AI agent frameworks, RAG, and LLM integration. Seeking to leverage deep industry expertise and an AI-forward product mindset in a Senior Product Management role.

AREAS OF EXPERTISE

Product Ownership • Product Strategy & Road mapping • Strategic Planning • AI-Driven Product Innovation • Full Lifecycle Delivery • Agile Coaching • Digital Transformation • Stakeholder Communication • Cross-Functional Leadership • Data Warehousing • Quality Control & Assurance

TECHNICAL SKILLS

AI & Emerging Tech: AI agent frameworks (LangChain, LangGraph, CrewAI, AutoGen); Agentic workflow design & multi-agent orchestration; Retrieval-Augmented Generation (RAG) & vector databases; Prompt engineering; LLM APIs (OpenAI, Anthropic Claude); Function calling & tool use; Model Context Protocol (MCP); AI product strategy & responsible AI

Product & ALM Tools: Azure DevOps; JIRA; VersionOne; Rally; TFS; HP ALM; Confluence; MS SharePoint; ServiceNow; MS Visio; Balsamiq; Axure RP; BitBucket; Bamboo

API & Testing: Postman; Swagger; SOAP UI; Insomnia; Selenium; Cucumber; Jest; SmartBear TestComplete

Platforms & Data: Windows; Ubuntu; CentOS; Oracle SQL Developer; SSMS; SQL Express; OLTP; OLAP; Data Marts; MongoDB; MySQL; NoSQL

BI & Data Integration: Tableau Desktop; Power BI; Crystal Reports; Informatica PowerCenter; Talend

Automation / RPA: UiPath; Automation Anywhere

Development: HTML; CSS; JavaScript (ES6); Node.js; Express.js; React.js; REST APIs; JSON; AJAX; jQuery; Bootstrap; Git; MERN Stack; MVC; Progressive Web Apps; OOP

Methodologies: Agile (Scrum, Kanban, SAFe); Waterfall; TDD; BDD

PROFESSIONAL EXPERIENCE

Product Owner — AgFirst Farm Credit Bank

Nov 2020 – Present

Applications: FIS ACBS/CLS, DNA Service Layer, DNA Extract, Annual IRS Project, Fiserv DNA Loan System Replacement

- Spearhead the adoption of the Agile Scrum framework by coordinating training sessions to upskill 15 staff, establishing structured ceremonies and backlog management practices that improve team velocity.
- Own, refine, and prioritize product backlogs for ACBS, the DNA Service Layer, and DNA Extract, enabling downstream consumption of DNA loan accounting data through the enterprise data warehouse.
- Establish product roadmaps and delivery plans supporting the ACBS 2024Q2 cumulative upgrade, SAP BO upgrade, and maintenance releases alongside bank-wide projects including IRS, Loans2 reporting, disaster recovery, nCino-Salesforce, and DNA upgrades.
- Optimize IRS data transfer through “IRSConnect”, a UI-, API-, and service-based application, eliminating manual upload of 500+ files to the vendor system and drastically reducing effort and risk of error.
- Drive RESTful API development for account maintenance and payments using a design-first methodology, enhancing the DNA Service Layer to support nCino/Salesforce (loan booking, customer maintenance, RabbitMQ event messaging).
- Capture requirements and user stories in Azure DevOps, leverage Postman and Swagger for API endpoint testing and documentation, and maintain an ADO dashboard enabling downstream API consumers to report bugs and monitor deployments.
- Led the Fiserv DNA data conversion team, integrating loan accounting data from legacy mainframe systems into Fiserv DNA — owning the product backlog, definition of done, and acceptance criteria while driving milestone planning (data slices, data cuts, mocks) with business stakeholders.

- Mentored onshore/offshore business analysts on test automation and ETL development, partnering with Fiserv to resolve data conversion issues, gaps, and requirements via Client360/ServicePoint.

RPA Business Analyst — US Bank

Sept 2020 – Nov 2020

Application: Corporate Payments Automation

- Served as RPA Business Analyst, redesigning a fully automated corporate payment process across CRPS and CPMS systems using Automation Anywhere.
- Monitored development progress and reported status to the project steering team, triaging production issues and resolving incident tickets in ServiceNow.
- Visualized as-is processes and requirements with Visio process flow diagrams and facilitated PI events in a SAFe environment using VersionOne.

Product Owner / RPA Business Systems Analyst — Capital One Bank

Jan 2018 – July 2020

Application: Fraud Analysis System & Automation Projects

- Facilitated the enhancement and redesign of the legacy fraud analysis system with backend web services and APIs, delivering parity functionality and more while practicing SAFe and Scrum at the team level.
- Increased fraud analysis efficacy by delivering a product that surfaced enhanced customer online-activity information to associates.
- Served as system subject-matter expert and primary point of contact for IT functions.

Business Analyst / Scrum Master — Whirlpool Corporation

Sept 2016 – Dec 2017

Application: Data Migration to Cloud-Based Data Warehouse

- Spearheaded development and implementation of a centralized data storage system for sales and logistics.
- Enabled process design changes through the execution of business and systems process analysis.
- Implemented process improvements that integrated new systems and processes with existing ones.

Business Analyst — HCSC (Blue Cross Blue Shield)

May 2015 – Aug 2016

Application: Patient Information Portal Enhancement

- Directed and guided the enhancement and redesign of the legacy portal for patient management.
- Launched a system that digitized patient and medical records and integrated health insurance services, claim filing, and appeal procedures.
- Enhanced UX and UI design by leading user interviews with subject-matter experts.

Business Analyst — Standard Chartered Bank

May 2013 – July 2014

Application: Power Loaner (PoLo) Loan Origination System

- Built the Power-Loaner system that automated loan modification processes for one of the region's largest international banks.
- Achieved the desired state by preparing process flow diagrams, mockup screens, and gap analyses.
- Communicated business requirements by conducting joint application development sessions with project stakeholders.

EDUCATION

Master of Science in Information Assurance - St. Cloud State University

Bachelor of Business Management in Marketing - University of Kelaniya
