Sr Product Owner | Product Manager

Strategic Product Owner and Product Manager with 11+ years of experience driving digital transformation and full lifecycle product delivery in enterprise banking environments. Proven success in leading Agile teams, implementing SAFe frameworks, and aligning product roadmaps with business goals. Skilled in RESTful API integration, stakeholder engagement, and cross-functional collaboration. Adept at backlog prioritization, data-driven decision-making, and delivering scalable solutions across complex systems. Certified SAFe PO/PM with hands-on expertise in tools like Azure DevOps, Postman, Swagger, and JIRA.

Areas of Expertise

- Full Lifecycle Delivery
- Agile Coaching
- Data Warehousing
- Quality Control & Assurance
- Digital Transformation
- Product Strategy
- Stakeholder Communication
- Agile & Waterfall Methodologies
- Cross-Functional Leadership

Technical Proficiency

Platforms:	Windows; Ubuntu; CentOS; Oracle SQL Developer; SSMS; SQL Express; OLTP; OLAP; Data Marts; MongoDB
Tools:	Azure DevOps; JIRA; VersionOne; BitBucket; Bamboo; MS SharePoint; ServiceNow; Confluence; RALLY; TFS; HP; ALM; MS Visio; Balsamiq; Axure RP; Jest; Insomnia; Selenium; Swagger; SOAP UI; Post-Mas; HP ALM; Cucumber; Tableau Desktop; Crystal Reports; Power BI; Informatica Desktop Center; Talend
Automation:	UI Path; Automation Anywhere; SmartBear; TestComplete
Languages:	HTML; CSS; Git; JavaScript; Bootstrap; The DOM; REST APIs; jQuery; JSON; AJAX; Node.js; Node Package Manager; ES6; Object-Oriented Programming; Express.js; MySQL; MVC paradigm; Handlebars.js View Engine, Sequelize; Progressive Web Apps; React.js; NoSQL; MERN Stack;
Methodologies:	Agile Development; Waterfall; Scrum; Kanban; SAFe; TDD; BDD

Professional Experience

Application/s: FIS ACBS/ CLS, DNA Services Layer, Annual IRS project, DNA Extract, Fiserv DNA Loan System Replacement

Company: AgFirst Farm Credit Bank

Role: Product Owner

Nov 2020 – Present

ACBS/ CLS V.2024Q2 Cumulative Upgrade project, supported the nCino-Salesforce project, and departmental BAU work.

- Spearhead the adoption of the Agile Scrum framework by coordinating training sessions to upskill 15 staff and enhance efficiency
- Coached team members unfamiliar with Agile principles, establishing structured Scrum ceremonies and effective backlog management practices, thus improving the team's velocity.
- Facilitated a seamless transition to Agile methodologies, enabling cross-functional teamwork and streamlined product delivery.
- Established a Product roadmap and Delivery Plans for the ACBS and the DNA Service Layer teams to support ACBS cumulative upgrade, SAP BO upgrade, and maintenance releases while supporting

critical bank-wide projects such as IRS, Loans2 reporting, Disaster recovery, nCino-Salesforce, and DNA Upgrades.

- Optimized IRS data transfer by implementing UI based application “IRSCConnect”, API, and service-based communication, drastically reducing manual effort (completely eliminated manual upload of 500+ files to the Vendor system) and risk of error.
- Implemented 'Design-first' methodology for the DNA Service Layer team, streamlining service requests and accelerating quality delivery.
- Drove API development for account maintenance and payments, collaborating with developers to align technical designs with business requirements.
- Enhanced DNA Service Layer to support nCino/ Salesforce implementation (Loan booking, customer maintenance, Event messaging via RabbitMQ)

Appointed to position, refine, and prioritize the product backlog of this homegrown multi-tenant/single instance DB system

(DNA Extract) populated with selected DNA loan accounting system business data, DNA Service Layer, and the Annual

IRS project.

- Succeeded in delivering DNA extract maintenance releases and special projects to facilitate downstream data consumption of DNA data through the enterprise data warehouse.
- Captured requirements/ documented user stories in ADO, maintained the ADO backlog, worked with stakeholders, and prioritized DNA middleware service layer APIs.
- Collaborated closely with cross-functional teams as a Product Owner, contributing to the successful design and implementation of RESTful APIs.
- Contributed to the development process by ensuring seamless communication between stakeholders and technical teams, utilizing tools such as Postman and Swagger for efficient DNA API endpoint testing and documentation
- Successfully implemented an ADO dashboard for downstream API consumers to report bugs and other requests to the DNA Service API team and monitor deployments and service tickets.
- Supported the successful implementation of Annual Loan Activity statements and the IRS reporting project after DNA go-live.
- Valued for the ability to scope product vision using clearly defined business increments, including feature strategy, creation, and grooming with a special focus on the minimum viable product (MVP).
- Proved highly effective in gathering and analyzing business requirements by utilizing discovery interviews, brainstorming sessions, and reverse engineering techniques.

Led the implementation of the Fiserv DNA data conversion team as a part of the DNA implementation to serve as a new loan accounting system for AgFirst Bank and the associations. Tasked with integrating loan accounting data from the legacy Mainframe-based loan accounting systems to Fiserv DNA.

- Owned the product backlog and drove technology build and test activities, focusing on the definition of done.
- Defined Acceptance criteria for features and Product backlog items.
- Collaborated with the business in milestone planning, such as Data Slices, Data Cuts, and Mocks.
- Conducted stakeholder reviews regarding Data validation, Data cleanup, Automation, DNA extract reviews, and ETL development.
- Mentored and worked alongside onshore/ offshore business analysts on the test automation and ETL development team.
- Worked with third-party vendor (Fiserv) regarding data conversion issues, GAPs, and communicating business requirements on client360/ ServicePoint.
- Kept track of bugs and defects on ADO and worked with Fiserv, internal SMEs, and developers to resolve them.
- Built collaborative relationships with business stakeholders to support milestone planning processes.
- Drove technology build and test activities by owning the product backlog.

Applications: Corporate Payments Automation

Company: US Bank

Role: RPA Business Analyst

Sept 2020 – Nov 2020

Served as RPA Business Analyst in redesigning a fully automated corporate payment process using CRPS and CPMS systems using Automation Anywhere.

- Monitored the development team's progress and reported the status to the project steering team to triage production issues and resolve incident tickets on ServiceNow.
- Leveraged Visio process flow diagrams expertise to visualize as-is processes and requirements.
- Facilitated PI events in a SAFe agile environment using VersionOne as the SDLC management tool.

Application: Fraud Analysis System & Automation Projects | Company: Capital One Bank

Role: Product Owner/ RPA Business Systems Analyst

Jan 2018 – July 2020

Owned responsibility for facilitating the enhancement and redesign of the legacy fraud analysis system with backend web services and APIs, providing users parity functionality and more. Practiced SAFe agile principles and SCRUM framework at the team level.

- Increased efficacy of fraud analysis through the development of a product that provided enhanced information to associates regarding customers' online activities.
- Served effectively as system subject expert and primary point of contact for IT functions.

Application: Data Migration to Cloud-Based Data Warehouse | Company: Whirlpool Corporation

Role: Business Analyst/ Scrum Master

Sept 2016 – Dec 2017

Spearheaded the development and implementation of a centralized data storage system for sales and logistics.

- Enabled process design changes through the execution of business and systems process analysis.
- Implemented process improvements that integrated new systems and processes with existing ones.

Application: Enhancement Patient Information Portal | Company: HCSC-Blue Cross Blue Shield

Role: Business Analyst

May 2015 - Aug

2016

Directed and guided the enhancement and redesign of the legacy portal for patient management.

- Launched a system that digitized patient and medical records and integrated health insurance services, claim filing, and appeal procedures.
- Enhanced UX and UI design by leading user interviews with subject matter experts.

Application: Power Loaner Loan Origination System | Company: Standard Chartered Bank

Role: Business Analyst

May 2013 - July

2014

Built Power-Loaner (PoLo) system that automated loan modification processes for one of the largest international banks in the region.

- Achieved the desired state by preparing process flow diagrams, mockup screens, and gap analyses.
- Communicated business requirements by taking the initiative to conduct joint application development interview sessions with project stakeholders.
